

Remote and Mobile Deposit

Remote Deposit

For businesses with larger monthly deposits.

Mobile Check Deposit

For businesses with fewer monthly deposits.

Remote Deposit

Remote Deposit is a means of making deposits directly to the bank from your place of business through a desktop scanner and Bank of Utah's online banking system. This allows you to deposit payments at your convenience and eliminates the need to deliver your checks in person.

Mobile Check Deposit

Small business owners who only have 50 checks or less to deposit per month can now take advantage of the same convenience that consumers love about personal mobile deposit. Using a smart phone app, mobile deposit makes it more convenient and economical for small businesses to accept checks as payment.
